

### **Amendments to the Specification**

Please amend page 28, lines 18-26 as follows:

Further, as the lid for checking 261 of the rear cushion for the rear wheel ~~61~~ 63 is provided to the bottom of the housing box 59, the lid for checking 261 is detached and the rear cushion 61 can be maintained and checked. As the rear cushion can be easily maintained and checked without detaching the housing box 59 and the body cover 70 (see Fig. 1), the workability is enhanced.

Furthermore, as the rear cushion for the rear wheel ~~61~~ 63 is arranged along the rear of the upper frame 22 of the diamond type frame 20, the rigidity of the rear cushion for rear wheel ~~61~~ 63 can be sufficiently secured by the upper frame 22 having large rigidity and the structure of suspension can be miniaturized.
